

# FRONTBASE

## The Scalable Relational Database Server for Linux

### Key Features:

#### Scalability –

FrontBase can easily and quickly scale from personal databases to full enterprise applications.

#### Unicode –

No need for multiple character set databases; FrontBase saves in Unicode format, and reinterprets the data into any specified character set.

#### Full SQL 92 Compliance –

FrontBase is the only relational database server on the market that is fully compliant with the SQL 92 Standard.

#### Web-based Manager –

No matter where you are, you are only a browser away from managing your data.

#### Data Migration –

FrontBase includes migration tools for FileMaker Pro and MySQL.

#### Referential Integrity–

FrontBase offers full referential integrity (PRIMARY KEY, UNIQUE, FOREIGN KEY, CHECK) as specified by the SQL 92 Standard.

FrontBase was created to fill the need for a robust and scalable relational database server that was Internet enabled, had no downtime, and required zero administration.

Today databases are a key component of the top Internet sites. Whether handling commerce or serving up content, the demand for flexible Internet database systems is at an all-time high. **FrontBase's speed, wide range of features, and flexible structure can give you the competitive edge.**

FrontBase is not only incredibly fast, but is also a very scalable relational database server. Our customers use FrontBase to create everything from small personal databases to some of the largest enterprise level databases in the world - yet without any need for expensive database administration staff.

FrontBase also has strong encryption options to protect both the client/ server communication and your applications data. FrontBase is also extremely portable, so **you can port to almost any UNIX or LINUX platform in less than a day.**

In business since 1996, FrontBase not only creates tools, but also mission critical applications, such as the Command and Control Center for the Copenhagen Police, a 24/7 emergency response system. With a dedicated Support division, and separate divisions for Tools, Core Development, and Professional Services, FrontBase is ready to help you achieve your goals with three offices around the world.

### The bottom line:

FrontBase is the only relational database server for Linux with all the features and standards you need to turn your idea into a business application where the sky is the limit.

# FRONTBASE Specifications

## Key Features:

- Unicode
- Full SQL 92 compliance
- TCP/IP
- Core engine created in ANSI C
- Can Handle Tera-byte size databases
- Gigabyte size CHARACTER column values
- Gigabyte size BLOBs and CLOBs
- Datastore encryption
- Client/Server communications encryption
- In-memory caching of tables
- Row-level privileges
- Advanced transaction control
- Live Database backup
- Multi-Column optimized B-tree indexing
- Replication/clustering
- Superfast start-up times
- Stored Procedures and functions
- Server side cursors
- Query plan information
- Multiple non-rectangular result sets
- MySQL migration tool
- Filemaker migration tool

## FrontBase Platforms

- Mac OS X and Mac OS X Server
- Yellow Dog Linux
- Mandrake Linux
- Debian Linux
- SuSE Linux
- Windows NT/2000
- RedHat on Intel
- FreeBSD
- Sun Solaris

## Connectivity:

- Omnis Studio
- REALBasic
- PHP
- Perl
- WebObjects
- ODBC
- JDBC

## Pricing

We offer a multi-level pricing that includes single licenses, developer licenses, even full Enterprise licensing. Please call us to discuss your specific needs.

## FrontBase Professional Services Division is here to help.

Using FrontBase Professional Services can dramatically reduce application development time and get your solution up and running faster. Whether you have FrontBase Professional Services build your entire solution, or work as part of your overall development team, your finished solution will be robust, reliable, and scalable.

To find out just how FrontBase Professional Services can jumpstart your success, call (949) 455-2913 or email
